CONFIDENTIAL INVESTMENT PLAN · SMART HOME ECOSYSTEM

SYLTRA.

Smart Living. Seamlessly Connected.

Comprehensive Investment Plan

From a Saudi entrepreneurial vision to a leading smart-home and smart-space ecosystem — a staged, de-risked path across three phases: field pilot, formation & team-building, and full commercial launch in the Saudi market.

SYLTRA SMART®
Riyadh, Kingdom of Saudi Arabia

01 About SYLTRA SMART

IDENTITY

SYLTRA SMART is a Saudi-founded, entrepreneurial technology company built to deliver a complete smart-home and smart-space ecosystem across the Kingdom of Saudi Arabia and the wider Gulf. We do not present ourselves as a device distributor — we are building a **brand**, a **platform**, and a **complete user experience**: our own SYLTRA app, a unified control system across every device, a local installation and support network, and a visual identity that stands next to global technology brands.

2026	14	3	KSA
Pilot program launch year	SABER / CITC certified product models	Staged phases to full market entry	Home market, with GCC ambition

How We Build Value

The hardware itself — relay modules, panels, locks, sensors — is produced through **certified global manufacturing partnerships** (full SABER and CITC compliance). This is a deliberate strategic choice that reduces capital risk at the formation stage and frees capital and effort toward what actually creates value for a customer and an investor alike:

- **Brand & identity** — a globally competitive design and positioning in a Saudi market hungry for a trusted local brand.
- **Software & platform** — the unified SYLTRA app and control system, the foundation for future subscription services and AI-driven automation.
- **Customer experience** — from first contact, through installation, to after-sales technical support.
- **Local commercial presence** — a Saudi sales and installation team, and direct B2B partnerships with contractors and real-estate developers.

> **In short:** the market judges SYLTRA on brand, experience, and service — that is exactly where we invest our capital and time. Manufacturing is a carefully managed operational detail, not the core of the story.

02 Vision & Mission

DIRECTION

Vision

For **SYLTRA SMART** to become Saudi Arabia's leading smart-home and smart-space brand — the first point of entry for every customer and real-estate developer seeking smart transformation across the Kingdom and the Gulf.

Mission

We simplify the shift to smart living through one unified, easy-to-install ecosystem, backed by a local team, fair pricing, and locally-certified industrial quality — making smart technology a natural part of every Saudi home and space.

Why SYLTRA Is an Entrepreneurial Company

- **A growing, underserved market** — accelerating demand for smart homes and smart cities in Saudi Arabia, driven by Vision 2030, giga-projects, and the real-estate and tourism boom.
- **A staged, de-risked entry model** — moving from a small, proven pilot to a full commercial launch, rather than committing all capital at once — a capital discipline rarely seen in early-stage smart-device ventures.
- **Early regulatory readiness** — securing full SABER and CITC certification across all fourteen models during the pilot phase, removing the single largest regulatory barrier facing any new entrant before official launch.
- **Capital-efficient manufacturing** — global manufacturing partnerships instead of owning a factory, directing capital toward brand-building, software, and the local commercial team.
- **A cross-disciplinary founding team** — experience in digital transformation, logistics, and executive brand-building translating directly into disciplined execution and clear operational governance from day one.

Bottom line: SYLTRA is not a repackaged-hardware project — it is an entrepreneurial company building a brand, a digital ecosystem, and a local service network, using smart manufacturing as an execution tool to enter the market faster and with less risk.

03 Business Model & Investment Roadmap

STRATEGY

The SYLTRA model rests on three connected pillars: **product & experience** (locally-certified hardware inside the SYLTRA identity), **platform & data** (a unified app and control system that opens the door to future services and AI), and **local presence** (a Saudi installation, support and customer-service team, with direct B2B partnerships). The supply chain is an execution detail within this model — not its essence.

> **Supply chain:** we work with specialized, certified Chinese factories under wholesale manufacturing agreements (the model known as White-Label) — a globally standard approach used by major emerging smart-device brands, allowing fast market entry with minimal capital risk, while actual investment stays concentrated in brand, software, customer experience, and the local commercial network.

Investment Roadmap — Three Staged Phases

Phase	Objective	Approx. Duration	Capital Range
01 — Pilot Program	Field-proof the concept in 5-8 homes and secure SABER/CITC certification for every model	≈ 4–5 months	\$9,600 – \$21,100
02 — Formation & Team-Building	Legal entity formation and a lean core team, running in parallel with the pilot	Parallel to Phase 01	SAR 3,850 – 8,600 + monthly payroll
03 — Official Commercial Launch	Full market entry across retail/online and B2B channels, and complete operating infrastructure	≈ 3.5–5 months	\$36,100 – \$65,800

Why staged?

Each phase is funded and evaluated only after the previous one proves out — reducing investor risk and creating clear review/exit checkpoints.

What's funded first?

The pilot program and legal formation launch together at minimal cost, to prove demand and regulatory readiness before any major commitment.

When does full entry happen?

Official launch begins only after pilot homes are live, customer feedback is positive, and certifications are fully issued.

04 Phase 1 — Pilot Program

FROM FACTORY TO FIRST HOME

Goal: cover a full mid-size home with minimal product variety, with enough stock to fully outfit 5 to 8 pilot homes — under the complete SYLTRA identity: app, packaging, and logo.

> Some factories set a minimum order quantity (MOQ) above the figures below for certain items (e.g. smart lock MOQ = 50 units) — budget for extra safety stock when negotiating.

Proposed Products & Quantities

Product	Qty	Selection Notes
1-gang relay module	40	Single lighting circuits (rooms, hallways)
2-gang relay module	20	Common dual-switch setups
4-gang relay module	10	Central kitchen/living room panels
3.5″ touch panel	15	Control point in each main room
11″ touch panel	6	Central control panel per home
Smart lock (indoor)	8	Bedrooms / offices
Smart lock (outdoor)	8	Main door of each pilot home
Security camera (indoor)	15	≈2 per home
Security camera (outdoor)	10	Entrance + perimeter
Motion sensor	25	—
Light / brightness sensor	15	—
Curtain / shutter motor controller	15	—
Water leak sensor	15	Kitchens & bathrooms
Gas leak sensor	8	Kitchen only
Central Gateway / Hub	8	One per home
Total	**≈ 218 units**	**~14 distinct product models**

04 Phase 1 — Estimated Manufacturing Cost

FOB CHINA

Product	Unit Price (USD)	Total for Qty
1-gang relay (×40)	$4 – $7	$160 – $280
2-gang relay (×20)	$6 – $10	$120 – $200
4-gang relay (×10)	$12 – $18	$120 – $180
3.5″ panel (×15)	$18 – $28	$270 – $420
11″ panel (×6)	$60 – $90	$360 – $540
Indoor smart lock (×8)	$35 – $55	$280 – $440
Outdoor smart lock (×8)	$55 – $90	$440 – $720
Indoor camera (×15)	$12 – $20	$180 – $300
Outdoor camera (×10)	$18 – $30	$180 – $300
Motion sensor (×25)	$3 – $6	$75 – $150
Light/brightness sensor (×15)	$3 – $6	$45 – $90
Curtain motor (×15)	$15 – $25	$225 – $375
Water leak sensor (×15)	$3 – $5	$45 – $75
Gas leak sensor (×8)	$8 – $14	$64 – $112
Gateway/Hub (×8)	$15 – $25	$120 – $200
Total Manufacturing (FOB)		**$2,684 – $4,382**

One-Time SYLTRA Identity Customization

Branding the logo and app with the SYLTRA name, mark, and colors across the full pilot batch — the first and only brand investment of its kind; it is not repeated at official launch unless new app features are added.

Item	Cost
SYLTRA logo customization on devices & packaging	$300 – $800
SYLTRA app customization (name + logo + colors)	$500 – $2,500
Total Identity Customization	**$800 – $3,300**

04 Phase 1 — Shipping & Regulatory Certification

SABER + CITC

Shipping & Customs Clearance

Item	Estimate
Air freight (fast, small pilot qty)	$800 – $1,500
Sea freight (cheaper, 25–35 days)	$300 – $600
Customs duty (~5%)	$150 – $250
VAT (15%)	$550 – $900

Regulatory Certification (SABER + CITC) — 14 Models

Authority	Certificate Type	Approx. Cost
SABER	Product Certificate (PC)	SAR 500 – 1,000 per model
SABER	Shipment Certificate (SC)	SAR 350 – 600 per shipment
CITC	Wireless approval (WiFi/BLE/Zigbee)	SAR 1,000 – 3,000 per model
Consultant (optional)	Full SABER/CITC file management	SAR 2,000 – 5,000

Item	SAR	Approx. USD
SABER (14 models, PC + SC)	7,500 – 14,600	$2,000 – $3,900
CITC (14 models)	10,000 – 25,000	$2,700 – $6,700
Consultant (optional)	2,000 – 5,000	$530 – $1,330

Strategic value: certifying all fourteen models during this phase removes the largest regulatory barrier to later expansion — the official launch phase will only need a new shipment certificate per shipment.

04 Phase 1 — Financial Summary & Timeline

PILOT

Total Financial Summary

Item	Low (USD)	High (USD)
Manufacturing (FOB)	$2,684	$4,382
SYLTRA identity customization	$800	$3,300
Shipping (cheapest: sea)	$300	$600
Customs + VAT	$700	$1,150
SABER certification	$2,000	$3,900
CITC certification	$2,700	$6,700
Administrative setup	$450	$1,100
Estimated Total	**≈ $9,600**	**≈ $21,100**

Approximate Timeline

Phase	Duration
Factory selection + samples + negotiation	3 – 5 weeks
SYLTRA identity customization (parallel to production)	2 – 4 weeks
Actual manufacturing	3 – 5 weeks
SABER/CITC process (parallel)	3 – 6 weeks
Sea shipping	4 – 5 weeks
Customs clearance	3 – 7 days
Installation & testing in first home	1 – 2 weeks
Total (first contact → first live SYLTRA home)	**≈ 4 – 5 months**

Phase Recommendations

1. Start with fewer models (8–9 instead of 14) to reduce certification cost in the first batch.
2. Request a Dev Kit from the factory before committing to the full quantity.
3. Start SABER/CITC procedures as soon as final samples are approved.
4. Use air freight for the first pilot batch to speed up market entry.
5. Keep a contingency budget (~15–20%) for MOQ differences or unexpected testing fees.

05 Phase 2 — Legal Formation & Team-Building

ENTITY + LEAN CORE TEAM

This phase runs in parallel with the pilot program: forming the SYLTRA legal entity in Saudi Arabia, and building a lean core team sufficient to run and support the pilot homes.

Formation Costs (One-Time)

Item	Authority	Approx. Cost
Commercial registration (sole proprietorship / LLC)	Ministry of Commerce	SAR 1,200 – 1,400/year
Notarized articles of association (if multiple partners)	Notary / Ministry of Justice	SAR 500 – 1,500
Chamber of Commerce membership	Chamber of Commerce	SAR 800 – 2,000/year
Municipal license (storage/distribution activity)	Municipality	SAR 1,000 – 3,000/year
VAT registration	ZATCA	Free (mandatory if revenue exceeds SAR 375,000/year)
SABER importer account	Saudi Standards Organization	Free (fees only upon certificate issuance)
National address	Saudi Post	SAR 200 – 400
Company stamp	Private service offices	SAR 150 – 300
Business bank account opening	Bank	Usually free (may require minimum balance)
Qiwa platform subscription	Ministry of Human Resources	Free
GOSI establishment registration	General Organization for Social Insurance	Free at registration
Approx. Total (initial formation)		**≈ SAR 3,850 – 8,600**

> A "sole proprietorship" is cheaper (no notarized formation deed), but liability falls entirely on the owner personally. SYLTRA as an LLC (even single-member) separates financial liability from personal assets — the preferred choice for a venture involving import and a long-term brand.

Recurring Annual Costs (Renewal)

Item	Annual Cost
Commercial registration renewal	SAR 1,200 – 1,400
Chamber of Commerce membership renewal	SAR 800 – 2,000
Municipal license renewal	SAR 1,000 – 3,000
Total Annual Renewal	**≈ SAR 3,000 – 6,400**

Phase 2 — Hiring Plan by Project Phase

Pilot Phase (Minimal Core Team)

Role	Count	Monthly Salary (SAR)	Notes
Project manager / full-time founder	1	—	Usually the founder, no fixed salary at this stage
Installation & field support technician	1	5,000 – 7,500	Part-time or freelance possible initially
Customer service / coordination (part-time)	1	3,000 – 4,500	Can be temporarily combined with another role

Official Launch Phase (Core Commercial Operations Team)

Role	Count	Monthly Salary (SAR)	Notes
Sales / business development manager (B2B)	1	8,000 – 14,000	Handles contractors and developers
Installation & technical support technician	2	5,500 – 8,000 each	Scales with order volume
Customer service & online support officer	1	4,000 – 6,000	Manages orders and inquiries
Digital marketing officer (full or part-time)	1	5,000 – 9,000	An agency can substitute for a direct hire
Accountant (part-time or outsourced firm)	1	2,000 – 4,000	Usually cheaper as an outsourced service
Warehouse & logistics officer	1	4,500 – 6,500	Can be merged with the technician role initially

05 Phase 2 — Hiring Costs & Saudization

GOSI + NITAQAT

Additional Hiring Costs (Beyond Base Salary)

Item	Rate / Cost	Notes
GOSI — employer share for Saudi nationals	~11.75% of salary	Covers pensions + unemployment insurance (SANED)
GOSI — employer share for non-Saudis	~2% of salary	Occupational hazards insurance only
Medical insurance (mandatory per employee)	SAR 1,200 – 3,500/year	Depends on insurer and coverage level
End-of-service gratuity (accrued provision)	~half a month's salary/year (first 5 yrs)	Calculated as an accrual, not an immediate payment
Foreign employee recruitment cost (if applicable)	SAR 5,000 – 12,000 one-time	Visa + residency + work permit fees + sponsorship
Work permit fees for non-Saudis (annual)	~SAR 2,400 – 9,600/year	Depends on the establishment's Saudization band (Nitaqat)

> Quick rule of thumb: actual cost of a Saudi employee ≈ base salary × 1.15 to 1.20 (including GOSI and medical insurance); for a non-Saudi employee ≈ salary × 1.10 to 1.15 + one-time recruitment cost.

Nitaqat (Saudization) Program

SYLTRA will be classified under Nitaqat based on headcount and Saudization ratio. For a small team (3–7 employees) in the trade/tech sector, the required ratio is typically moderate, but the exact ratio should be verified via the Qiwa platform at actual registration. Hiring at least one Saudi employee early (e.g. customer service or marketing) helps avoid Nitaqat classification issues later.

Phase Recommendations

1. Start with a very lean pilot team (a single technician, possibly part-time); avoid full-time hires until the concept is proven.
2. Use an outsourced accountant instead of a direct hire initially — cheaper and more flexible.
3. For digital marketing, consider an agency or freelancer in the first phase instead of a permanent employee.
4. Hire the first Saudi employee early (even part-time) to avoid Nitaqat classification issues later during expansion.
5. Secure medical insurance and social insurance from day one of hiring — penalties for delays are far higher than the cost of early compliance.

05 Phase 2 — Total Financial Summary

Item	Low (SAR)	High (SAR)
Formation costs (one-time)	3,850	8,600
Pilot team salaries (monthly)	8,000	12,000
Additional pilot team costs (GOSI + medical)	1,200	2,200
Official launch team salaries (monthly, 7 employees)	29,000	47,500
Additional launch team costs (GOSI + medical)	4,500	8,500
Approx. Monthly Total at Full Operation	**≈ 33,500**	**≈ 56,000**

This table clearly separates the **one-time formation capital** (SAR 3,850–8,600) from the **recurring monthly operating rate** (SAR 33,500–56,000 once the official launch team is fully staffed) — a distinction any investor needs when assessing working-capital requirements.

06 Phase 3 — Official Commercial Launch

FROM PILOT TO MARKET LEADERSHIP

This phase begins after a successful pilot (working pilot homes, positive customer feedback, issued SABER/CITC certificates). The goal: build sufficient commercial inventory for the first 3–4 months of sales across two channels together — retail/online + B2B with contractors and developers — while establishing complete operational infrastructure (warehouse, technical support, marketing).

> **Key difference from the pilot:** quantities scale up roughly 8–10x, and new operating costs appear (warehouse, team, marketing, sales platform) that weren't needed during the testing phase.

Proposed Products & Quantities (First Commercial Batch)

Product	Qty	Notes
1-gang relay module	350	Likely highest demand
2-gang relay module	180	—
4-gang relay module	90	—
3.5″ touch panel	140	—
11″ touch panel	60	Higher margin, more B2B demand
Smart lock (indoor)	70	—
Smart lock (outdoor)	80	Most requested by contractors
Security camera (indoor)	130	—
Security camera (outdoor)	90	—
Motion sensor	220	—
Light / brightness sensor	140	—
Curtain / shutter motor controller	130	—
Water leak sensor	140	—
Gas leak sensor	70	—
Central Gateway / Hub	75	—
Total	**≈ 1,965 units**	**Same 14 models as pilot**

This volume may qualify SYLTRA for a 10–20% unit-price discount versus pilot pricing — to be negotiated explicitly with the factory based on the successful pilot track record.

06 Phase 3 — Estimated Manufacturing Cost

FOB CHINA, AFTER VOLUME DISCOUNT

Product	Discounted Unit Price (USD)	Total for Qty
1-gang relay (×350)	$3.5 – $6	$1,225 – $2,100
2-gang relay (×180)	$5 – $8.5	$900 – $1,530
4-gang relay (×90)	$10 – $15	$900 – $1,350
3.5″ panel (×140)	$15 – $24	$2,100 – $3,360
11″ panel (×60)	$52 – $78	$3,120 – $4,680
Indoor smart lock (×70)	$30 – $47	$2,100 – $3,290
Outdoor smart lock (×80)	$47 – $77	$3,760 – $6,160
Indoor camera (×130)	$10 – $17	$1,300 – $2,210
Outdoor camera (×90)	$15 – $26	$1,350 – $2,340
Motion sensor (×220)	$2.5 – $5	$550 – $1,100
Light/brightness sensor (×140)	$2.5 – $5	$350 – $700
Curtain motor (×130)	$13 – $21	$1,690 – $2,730
Water leak sensor (×140)	$2.5 – $4.5	$350 – $630
Gas leak sensor (×70)	$7 – $12	$490 – $840
Gateway/Hub (×75)	$13 – $21	$975 – $1,575
Total Manufacturing (FOB)		**$21,160 – $34,595**

SYLTRA identity customization fees (logo + app) were already paid during the pilot and do not repeat, unless new app features are added (optional additional estimate: $500 – $2,000).

06 Phase 3 — Shipping, Certification & Infrastructure

COMMERCIAL VOLUME

Shipping & Customs Clearance (Commercial Volume)

Item	Estimate
Sea freight (partial or full container)	$1,800 – $3,500
Customs duty (~5%)	$1,150 – $1,900
VAT (15%)	$3,600 – $5,900
Shipment insurance (optional, ~0.5%)	$120 – $200

Regulatory Certification — Only Needed Now

Item	Note	Cost
New Shipment Certificate (SC)	Per new commercial shipment	SAR 350 – 600 × number of shipments
PC renewal/update (if needed)	Only if a model's design changed	SAR 500 – 1,000 per affected model
New models (if added)	Full SABER + CITC	Depends on number of new models

> **The biggest financial advantage of launching after a successful pilot:** the fixed certification cost (SABER+CITC ≈ $4,700–$10,600) was already paid — now only a new Shipment Certificate (SC) is needed per commercial shipment.

New Operational Infrastructure for Official Launch

Item	Monthly / One-Time Estimate
Storage warehouse (lease + setup)	SAR 3,000 – 8,000/month
Online sales platform (Salla/Zid + payment gateway)	SAR 1,500 – 4,000 setup + minor monthly fees
Technical support & installation team (1–2 technicians)	SAR 6,000 – 12,000/month per technician
Digital marketing (initial launch)	SAR 10,000 – 30,000 for first 3 months
Product photography + professional marketing content	SAR 3,000 – 8,000 (one-time)
Trade show / launch event participation (optional)	SAR 5,000 – 20,000
Warranty & maintenance contracts (initial spare parts system)	SAR 2,000 – 5,000

06 Phase 3 — Financial Summary & Timeline

OFFICIAL LAUNCH

Total Financial Summary

Item	Low (USD)	High (USD)
Manufacturing (FOB, after volume discount)	$21,160	$34,595
Shipping + insurance	$1,920	$3,700
Customs + VAT	$4,750	$7,800
Additional certifications (SC + possible updates)	$300	$1,200
Operational infrastructure (≈ 3 months)	$8,000	$18,500
Estimated Total	**≈ $36,100**	**≈ $65,800**

This is an initial figure for the first commercial batch + 3 months of operations. It doesn't include working capital for the second purchase cycle, which should ideally be funded from initial sales revenue.

Approximate Timeline

Phase	Duration
Review pilot results & finalize order with factory	1 – 2 weeks
Negotiate wholesale pricing + confirm PO	1 – 2 weeks
Actual manufacturing of commercial quantity	5 – 8 weeks
Warehouse & online platform setup (parallel)	3 – 5 weeks
Sea freight (FCL/LCL)	4 – 6 weeks
Customs clearance	5 – 10 days
Marketing launch campaign + sales opening	2 – 3 weeks (starts before shipment arrives)
Total (launch decision → first actual sales)	**≈ 3.5 – 5 months**

Phase Recommendations

1. Negotiate official wholesale pricing with the factory based on pilot performance — SYLTRA is now a proven customer, not a new one.
2. Avoid buying the entire commercial quantity in one batch — split it into two shipments (70% + 30%) to reduce overstock risk.
3. Start the marketing campaign and pre-orders 3–4 weeks before the shipment arrives to minimize warehouse dwell time.
4. Close preliminary B2B contracts with 2–3 contractors/developers before launch to guarantee confirmed orders from day one.
5. Reserve 10–15% of the operating budget as contingency for customs delays or quality issues in the large first batch.

07 Total Financial Summary — All Phases

ONE UNIFIED INVESTMENT VIEW

The three original documents presented each phase in isolation. The table below brings them together into a single investment view, with a clear split between **one-time capital (CapEx)** and the **recurring monthly operating rate (OpEx)** — exactly what an investor needs to evaluate SYLTRA accurately.

One-Time Capital Through Full Official Launch

Phase	Low	High
01 — Pilot Program (product, identity, shipping, certification)	$9,600	$21,100
02 — Legal Formation (one-time fees)	≈ $1,030 (SAR 3,850)	≈ $2,295 (SAR 8,600)
03 — Official Launch (product, shipping, certification, 3-month infrastructure)	$36,100	$65,800
Total One-Time Capital	**≈ $46,700**	**≈ $89,200**

Recurring Monthly Operating Rate (Once Launch Team Is Fully Staffed)

Item	Low	High
Full commercial team salaries (7 employees) + GOSI & medical insurance	SAR 33,500 (≈ $8,900)	SAR 56,000 (≈ $14,900)

$46.7K–$89.2K
One-time capital through full official launch

$8.9K–$14.9K
Monthly operating rate at full staffing

≈10–12
Months, approximately, from idea to full commercial leadership

Recommended total capital range (one-time capital + a three-month operating reserve as a safety buffer before revenue matures): **≈ $73,500 – $134,000** (≈ SAR 275,600 – 502,500). This is a planning estimate prepared by SYLTRA, not part of the original per-phase figures, offered to help investors size the decision.

Approximate conversion: 1 USD ≈ 3.75 SAR. Line-item detail for every figure appears in Sections 04–06.

08 Combined Timeline

FROM IDEA TO MARKET LEADERSHIP

The pilot program and legal formation launch together; the official launch begins only after the pilot succeeds and commercial demand is confirmed.

Phase	Duration	Starts After
Pilot program (factory selection → first live home)	≈ 4 – 5 months	Launch decision
Legal formation & lean core team	4 – 8 weeks (parallel)	Launch decision
Review pilot results & confirm commercial order	1 – 2 weeks	Pilot phase close-out
Official commercial launch (manufacturing → first actual sales)	≈ 3.5 – 5 months	Commercial order confirmed
Approx. Total — First Contact to Full Commercial Leadership	**≈ 10 – 12 months**	

> This is a cumulative timeline, not a simple sum of durations: formation runs in parallel with the pilot at no added time, while official launch begins only after a successful close-out of the previous phase — giving the investor a clear review checkpoint roughly at the midpoint, before the larger share of capital is committed.

09 Unified Strategic Recommendations

DISTILLED ACROSS ALL PHASES

The recommendations from all three phases are merged into ten non-repeating strategic actions, ordered by their natural execution sequence.

1. **Start the first pilot batch with fewer models** (8–9 instead of 14) to lower regulatory certification cost.
2. **Request a Dev Kit from the factory** before committing to the full quantity, and start SABER/CITC procedures as soon as final samples are approved.
3. **Use air freight for the first pilot batch** to speed up market entry, despite the relatively higher cost.
4. **Start with a very lean team** (one part-time technician), using an outsourced accountant and a marketing agency instead of direct hires until the concept is proven.
5. **Hire the first Saudi employee early** (even part-time), and secure medical and social insurance from day one to avoid penalties and later Nitaqat classification issues.
6. **Negotiate official wholesale pricing with the factory** when moving to official launch — SYLTRA is now a proven customer, not a new one.
7. **Avoid buying the entire commercial quantity in one batch** — split it into two shipments (70% + 30%) to reduce overstock risk.
8. **Start the marketing campaign and pre-orders** 3–4 weeks before the commercial shipment arrives to minimize warehouse dwell time.
9. **Close preliminary B2B contracts with 2–3 contractors/developers** before official launch to guarantee confirmed orders from day one.
10. **Keep a contingency reserve** — 15–20% of the pilot budget, 10–15% of the official launch budget, and 3–6 months of payroll as a general operating buffer.

10

CLOSING — INVESTMENT INVITATION

SYLTRA SMART: a Saudi entrepreneurial brand, ready to lead the smart-home market

This plan lays out a staged, de-risked path — from a small, proven pilot, to disciplined legal formation, to a full commercial launch — giving every investor clear review checkpoints before each larger capital commitment.

- A fast-growing Saudi and Gulf market for smart homes and smart spaces, driven by Vision 2030.
- Early regulatory readiness (SABER + CITC) removing the largest barrier facing any new competitor.
- A capital-efficient manufacturing model that keeps investment concentrated in brand, platform, and local team.
- A founding team with executive experience in digital transformation, logistics, and branding (LEOMAX).

SYLTRA SMART®

Riyadh, Kingdom of Saudi Arabia

anas.msd.ramsees@gmail.com
