

CONFIDENTIAL · INVESTOR PRESENTATION

SYLTRA.

Smart Living. Seamlessly Connected.

Every home in Saudi Arabia is filling up with smart devices.

None of them are actually smart.

Disconnected apps. Foreign brands. Rules that break the moment life changes. A SAR 20B+ market : and nobody owns the experience.

SAR 20B+

Saudi smart home & IoT market by 2030

Smart Homes Today Are Dumb Systems With Good Marketing

5+ apps per home

Every brand ships its own app. Nothing talks to anything.

Rules, not intelligence

IF-THEN automations that break when real life happens.

Zero local identity

Foreign call centers, English-first apps, no Saudi support.

THE SOLUTION

SYLTRA Adaptive : The Home's Brain, Not Another Gadget

One Saudi platform that understands the state of your home : who's in it, what it costs, how it feels : and continuously plans how it should run. You set the goal. The engine does the rest.

It sees

A live state model of the whole home: occupancy, climate, energy, security.

It decides

Generates the best operating plan for this moment : not a fixed rule.

It verifies

Closed loop: executes, measures the result, replans if the goal isn't met.

It learns

Every manual correction teaches it your real preferences.

Device companies sell switches. We sell the intelligence layer they'll all need.

THE PRODUCT

14+ Certified Devices. One App. One Identity.

Switches & Panels

1/2/4-gang, 3.5" & 11" displays

Security

Locks, doorbells, indoor & outdoor cameras

Sensors

Motion, light, water leak, gas

Comfort

Curtains, AC control, lighting

Hub

Local brain : works without internet

App

Arabic-first, one app for everything

Every model certified for the Saudi market (SABER + CITC). Priced 15% below the local market average : item by item.

Three Revenue Engines, One Flywheel

1

Projects

Installation & commissioning: apartments SAR 11-20K, villas SAR 20-45K. Cash from month 2.

2

Devices

5-tier pricing across retail, wholesale, agents & independent technicians. 44-66% gross margin.

3

Platform

SYLTRA Adaptive subscriptions & licensing. The high-margin layer that compounds.

Projects fund devices. Devices build the installed base. The installed base becomes subscribers.

THE NUMBERS

Break-Even in Month 4. Capital Back in Month 9.

SAR	Year 1	Year 2	Year 3
Revenue	2.44M	5.49M	10.17M
Operating profit	825K	2.39M	4.97M
Operating margin	33.8%	43.6%	48.9%

Month 4

monthly operating break-even

Month 9

full capital recovery incl. capex

48.9%

operating margin by Year 3

Year 1 is a monthly, formula-driven model : auditable cell by cell. Years 2-3 use conservative assumptions documented in the financial plan.

Why We're Hard to Copy

Architecture, not features

A state model + planning engine + closed loop. Competitors would need to rebuild from zero, not update an app.

Compounding data

Every operating cycle makes the engine smarter. The gap widens with every installed home.

Local execution

Saudi identity, Saudi certifications, Saudi support team : the part foreign brands never localize.

Channel lock-in

Independent technicians buy at distributor pricing : an army of installers with zero payroll.

THE ASK

SAR 900,000 for 20%

Priced off a computed capital need of ~SAR 1,059,000 : not a wish.

Use of Funds

6-month foundation & operations	805,880
First 1,000-unit production batch	≈157,000
Operating reserve (~10%)	≈96,000
Total targeted need	≈1,059,000

Round Terms

Pre-money valuation	SAR 3.6M
Post-money valuation	SAR 4.5M
Investor stake	20%
Founders (3)	80%

Base case: full invested capital recovered by Month 9. Year 2 starts cash-flow positive : no follow-on round required.

Let's Build the Saudi Smart Home Standard : Together
