

Goal: cover a full mid-size home with minimal product variety, with enough stock to fully outfit 5 to 8 pilot homes : under the complete SYLTRA identity: app, packaging, and logo.

Some factories set a minimum order quantity (MOQ) above the figures below for certain items (e.g. smart lock MOQ = 50 units) : budget for extra safety stock when negotiating.

Proposed Products & Quantities

Product	Qty	Selection Notes
1-gang relay module	40	Single lighting circuits (rooms, hallways)
2-gang relay module	20	Common dual-switch setups
4-gang relay module	10	Central kitchen/living room panels
3.5" touch panel	15	Control point in each main room
11" touch panel	6	Central control panel per home
Smart lock (indoor)	8	Bedrooms / offices
Smart lock (outdoor)	8	Main door of each pilot home
Security camera (indoor)	15	≈2 per home
Security camera (outdoor)	10	Entrance + perimeter
Motion sensor	25	:
Light / brightness sensor	15	:
Curtain / shutter motor controller	15	:
Water leak sensor	15	Kitchens & bathrooms
Gas leak sensor	8	Kitchen only
Central Gateway / Hub	8	One per home
Total	≈ 218 units	~14 distinct product models

Product	Unit Price (USD)	Total for Qty
1-gang relay (×40)	\$4 – \$7	\$160 – \$280
2-gang relay (×20)	\$6 – \$10	\$120 – \$200
4-gang relay (×10)	\$12 – \$18	\$120 – \$180
3.5" panel (×15)	\$18 – \$28	\$270 – \$420
11" panel (×6)	\$60 – \$90	\$360 – \$540
Indoor smart lock (×8)	\$35 – \$55	\$280 – \$440
Outdoor smart lock (×8)	\$55 – \$90	\$440 – \$720
Indoor camera (×15)	\$12 – \$20	\$180 – \$300
Outdoor camera (×10)	\$18 – \$30	\$180 – \$300
Motion sensor (×25)	\$3 – \$6	\$75 – \$150
Light/brightness sensor (×15)	\$3 – \$6	\$45 – \$90
Curtain motor (×15)	\$15 – \$25	\$225 – \$375
Water leak sensor (×15)	\$3 – \$5	\$45 – \$75
Gas leak sensor (×8)	\$8 – \$14	\$64 – \$112
Gateway/Hub (×8)	\$15 – \$25	\$120 – \$200
Total Manufacturing (FOB)		\$2,684 – \$4,382

One-Time SYLTRA Identity Customization

Branding the logo and app with the SYLTRA name, mark, and colors across the full pilot batch : the first and only brand investment of its kind; it is not repeated at official launch unless new app features are added.

Item	Cost
SYLTRA logo customization on devices & packaging	\$300 – \$800
SYLTRA app customization (name + logo + colors)	\$500 – \$2,500
Total Identity Customization	\$800 – \$3,300

Shipping & Customs Clearance

Item	Estimate
Air freight (fast, small pilot qty)	\$800 – \$1,500
Sea freight (cheaper, 25–35 days)	\$300 – \$600
Customs duty (~5%)	\$150 – \$250
VAT (15%)	\$550 – \$900

Regulatory Certification (SABER + CITC) : 14 Models

Authority	Certificate Type	Approx. Cost
SABER	Product Certificate (PC)	SAR 500 – 1,000 per model
SABER	Shipment Certificate (SC)	SAR 350 – 600 per shipment
CITC	Wireless approval (WiFi/BLE/Zigbee)	SAR 1,000 – 3,000 per model
Consultant (optional)	Full SABER/CITC file management	SAR 2,000 – 5,000

Item	SAR	Approx. USD
SABER (14 models, PC + SC)	7,500 – 14,600	\$2,000 – \$3,900
CITC (14 models)	10,000 – 25,000	\$2,700 – \$6,700
Consultant (optional)	2,000 – 5,000	\$530 – \$1,330

Strategic value: certifying all fourteen models during this phase removes the largest regulatory barrier to later expansion : the official launch phase will only need a new shipment certificate per shipment.

Total Financial Summary

Item	Low (USD)	High (USD)
Manufacturing (FOB)	\$2,684	\$4,382
SYLTRA identity customization	\$800	\$3,300
Shipping (cheapest: sea)	\$300	\$600
Customs + VAT	\$700	\$1,150
SABER certification	\$2,000	\$3,900
CITC certification	\$2,700	\$6,700
Administrative setup	\$450	\$1,100
Estimated Total	≈ \$9,600	≈ \$21,100

Approximate Timeline

Phase	Duration
Factory selection + samples + negotiation	3 – 5 weeks
SYLTRA identity customization (parallel to production)	2 – 4 weeks
Actual manufacturing	3 – 5 weeks
SABER/CITC process (parallel)	3 – 6 weeks
Sea shipping	4 – 5 weeks
Customs clearance	3 – 7 days
Installation & testing in first home	1 – 2 weeks
Total (first contact → first live SYLTRA home)	≈ 4 – 5 months

Phase Recommendations

- 1 Start with fewer models (8–9 instead of 14) to reduce certification cost in the first batch.
- 2 Request a Dev Kit from the factory before committing to the full quantity.
- 3 Start SABER/CITC procedures as soon as final samples are approved.
- 4 Use air freight for the first pilot batch to speed up market entry.
- 5 Keep a contingency budget (~15–20%) for MOQ differences or unexpected testing fees.

Same 14-model product mix, scaled $\approx 4.6\times$: a first commercial-scale batch sufficient to outfit dozens of homes and projects, versus just 5–8 homes in the pilot batch.

Some factories set a minimum order quantity (MOQ) above the figures below for certain items : budget for extra safety stock when negotiating.

Scaled Products & Quantities

Product	Qty	Selection Notes
1-gang relay module	183	Single lighting circuits (rooms, hallways)
2-gang relay module	92	Common dual-switch setups
4-gang relay module	46	Central kitchen/living room panels
3.5" touch panel	69	Control point in each main room
11" touch panel	28	Central control panel per home
Smart lock (indoor)	37	Bedrooms / offices
Smart lock (outdoor)	37	Main door of each home
Security camera (indoor)	69	≈ 2 per home
Security camera (outdoor)	46	Entrance + perimeter
Motion sensor	113	:
Light / brightness sensor	69	:
Curtain / shutter motor controller	69	:
Water leak sensor	68	Kitchens & bathrooms
Gas leak sensor	37	Kitchen only
Central Gateway / Hub	37	One per home
Total	1,000 units	~ 14 distinct product models

Product	Unit Price (USD)	Total for Qty
1-gang relay (×183)	\$4 – \$7	\$732 – \$1,281
2-gang relay (×92)	\$6 – \$10	\$552 – \$920
4-gang relay (×46)	\$12 – \$18	\$552 – \$828
3.5" panel (×69)	\$18 – \$28	\$1,242 – \$1,932
11" panel (×28)	\$60 – \$90	\$1,680 – \$2,520
Indoor smart lock (×37)	\$35 – \$55	\$1,295 – \$2,035
Outdoor smart lock (×37)	\$55 – \$90	\$2,035 – \$3,330
Indoor camera (×69)	\$12 – \$20	\$828 – \$1,380
Outdoor camera (×46)	\$18 – \$30	\$828 – \$1,380
Motion sensor (×113)	\$3 – \$6	\$339 – \$678
Light/brightness sensor (×69)	\$3 – \$6	\$207 – \$414
Curtain motor (×69)	\$15 – \$25	\$1,035 – \$1,725
Water leak sensor (×68)	\$3 – \$5	\$204 – \$340
Gas leak sensor (×37)	\$8 – \$14	\$296 – \$518
Gateway/Hub (×37)	\$15 – \$25	\$555 – \$925
Total Manufacturing (FOB)		\$12,380 – \$20,206

SYLTRA Identity Customization : A One-Time Cost, Not Repeated Per Batch

Logo and app customization (\$800 – \$3,300) is a one-time setup investment paid with the first batch only (the 218-unit pilot). If this 1,000-unit order is a later commercial order placed after a successful pilot : not a replacement for it : this line item is **not added again** to this batch's budget.

Identity customization only recurs if new app features or an entirely new packaging design are introduced : not because of higher quantity or a repeat order from the same factory.

Shipping & Customs Clearance (Commercial-Scale Shipment)

Item	Estimate
Sea freight (first commercial batch, 25–35 days)	\$700 – \$1,400
Customs duty + VAT (≈20% of FOB value)	\$3,220 – \$5,250

Regulatory Certification (SABER + CITC) : Still Just 14 Models

The key scaling insight: SABER and CITC certification is billed **per model, not per unit** : so this cost stays exactly the same even as quantity rises from 218 to 1,000 units. That means per-unit certification cost drops from ≈\$22–\$48 to just ≈\$4.7–\$10.7.

Item	SAR	Approx. USD
SABER (14 models, PC + SC)	7,500 – 14,600	\$2,000 – \$3,900
CITC (14 models)	10,000 – 25,000	\$2,700 – \$6,700
Administrative setup	1,700 – 4,100	\$450 – \$1,100
Total Certification & Admin (Fixed)		\$5,150 – \$11,700

The two summaries below assume the 1,000-unit batch is a **later commercial order** placed after a successful pilot (218 units) : not a replacement first order. Scenario B therefore excludes identity customization (already paid) and assumes model certification (PC) carries over, needing only a new SABER shipment certificate (SC) per shipment.

Scenario A : As a Standalone First Order (Includes Identity Customization)

Item	Low (USD)	High (USD)
Manufacturing (FOB)	\$12,380	\$20,206
SYLTRA identity customization	\$800	\$3,300
Shipping (sea)	\$700	\$1,400
Customs + VAT	\$3,220	\$5,250
SABER + CITC + admin certification	\$5,150	\$11,700
Total	≈ \$22,250	≈ \$41,856

Scenario B : As a Later Batch After a Successful Pilot (More Realistic)

Item	Low (USD)	High (USD)
Manufacturing (FOB)	\$12,380	\$20,206
SYLTRA identity customization	0 : already paid	0
Shipping (sea)	\$700	\$1,400
Customs + VAT	\$3,220	\$5,250
New SABER shipment certificate (SC only)	\$93	\$160
Light administrative processing	\$150	\$400
Total	≈ \$16,543	≈ \$27,416

Financial impact of not repeating identity customization and full certification: Scenario B is roughly **\$5,700 – \$14,500** cheaper than Scenario A : exactly why certifying all fourteen models during the initial pilot pays off on every batch that follows.

Net cost first, then local market pricing for comparable products (researched: Noon, Jarir, Amazon.sa), then the SYLTRA price : set **15% below the local market average**, a penetration pricing strategy to win early market share, layered on top of the unified identity, installation, and support advantage.

Product	Net Cost	Local Market (Competitor)	Our Price (SYLTRA)	Gap vs. Competitor
1-gang relay module	21	150	130	-20
2-gang relay module	30	190	160	-30
4-gang relay module	56	280	240	-40
3.5" touch panel	86	300	255	-45
11" touch panel	281	800	680	-120
Smart lock (indoor)	169	450	385	-65
Smart lock (outdoor)	272	650	555	-95
Camera (indoor)	60	150	130	-20
Camera (outdoor)	90	250	215	-35
Motion sensor	17	90	75	-15
Light sensor	17	85	70	-15
Curtain motor	75	350	300	-50
Water leak sensor	15	100	85	-15
Gas leak sensor	41	120	100	-20
Central Hub/Gateway	75	200	170	-30

Our price is roughly 15% below the local market across every category : SYLTRA competes on price and unified experience together, and overall gross margin ($\approx 44\%$ – 84% depending on category) remains healthy despite the deliberate discount.

The prices below are based on direct research into Saudi retail pricing (Noon, Jarir, Amazon.sa, and specialized smart-home stores) for comparable mid-to-high-quality products. SYLTRA prices have been set **15% below the local market average** : a penetration pricing strategy to accelerate commercial acceptance and win early market share.

Pricing strategy: SYLTRA competes below market price while adding further advantage through unified identity, professional installation, and local support : margin stays healthy through disciplined manufacturing and certification cost control, despite the deliberate price cut.

Suggested Pricing Table (Per Unit, SAR)

Product	Suggested Price (SAR)	Qty (218)	Revenue (SAR)
1-gang relay module	130	40	5,200
2-gang relay module	160	20	3,200
4-gang relay module	240	10	2,400
3.5" touch panel	255	15	3,825
11" touch panel	680	6	4,080
Smart lock (indoor)	385	8	3,080
Smart lock (outdoor)	555	8	4,440
Camera (indoor)	130	15	1,950
Camera (outdoor)	215	10	2,150
Motion sensor	75	25	1,875
Light sensor	70	15	1,050
Curtain motor	300	15	4,500
Water leak sensor	85	15	1,275
Gas leak sensor	100	8	800
Central Hub/Gateway	170	8	1,360

Real Market Pricing : 1,000-Unit Batch

SAME RESEARCHED PRICES

Product	Suggested Price (SAR)	Qty (1,000)	Revenue (SAR)
1-gang relay module	130	183	23,790
2-gang relay module	160	92	14,720
4-gang relay module	240	46	11,040

Product	Suggested Price (SAR)	Qty (1,000)	Revenue (SAR)
3.5" touch panel	255	69	17,595
11" touch panel	680	28	19,040
Smart lock (indoor)	385	37	14,245
Smart lock (outdoor)	555	37	20,535
Camera (indoor)	130	69	8,970
Camera (outdoor)	215	46	9,890
Motion sensor	75	113	8,475
Light sensor	70	69	4,830
Curtain motor	300	69	20,700
Water leak sensor	85	68	5,780
Gas leak sensor	100	37	3,700
Central Hub/Gateway	170	37	6,290
Total Potential Revenue (1,000 Units)			SAR 189,600

Actual Margin at Market-Matched Pricing

Metric	218 Units	1,000 Units
Potential revenue (SAR)	41,185	189,600
Estimated landed cost (SAR)	13,815 – 22,995	61,125 – 100,710
Estimated gross margin	≈ 44% – 66%	≈ 47% – 68%

Key takeaway: even pricing 15% below the local market (a penetration strategy), SYLTRA's gross margin remains healthy (≈44%–66% depending on batch size) : driven by disciplined manufacturing and certification cost control.

Sources: reference prices from Noon.com, Jarir.com, and Amazon.sa for comparable categories (Yale locks, EZVIZ/Hikvision cameras, Tuya/Zigbee control panels, Zemismart curtain motors) : August 2026. Final pricing to be confirmed after real market acceptance testing.

Five clear pricing layers, from net cost to the end-customer price. **SYLTRA's internal technical team price is lower than the agent/distributor price** : because the team treats the company as an internal supply source for its own projects (the end customer deals with SYLTRA directly), while an external agent needs a larger margin since they resell in the open market and carry their own marketing and inventory costs.

New revenue channel : independent technicians: technicians not employed by SYLTRA (no fixed salary) can buy at **the same agent/distributor price** to run their own projects with their own clients. This doesn't add a new numeric price tier : it **opens an additional demand channel** at the existing distribution tier : more sales volume with no hiring commitment or change to the pricing structure.

Tier order (lowest to highest):

- 1) **Net price** : actual landed cost from the factory (no margin).
- 2) **SYLTRA technical team price (employees)** : internal price when SYLTRA itself executes a project.
- 3) **Wholesale price** : for bulk buyers (contractors, developers) without direct installation service.
- 4) **Distributor / independent technician price** : the same price for both channels.
- 5) **End-customer (retail) price** : 15% below the local market average.

Price Table (SAR, Per Unit)

Product	Net Price	SYLTRA Technical Team	Wholesale	Distributor / Independent Techs	Retail
1-gang relay module	21	48	76	103	130
2-gang relay module	30	62	95	128	160
4-gang relay module	56	102	148	194	240
3.5" touch panel	86	128	170	213	255
11" touch panel	281	381	480	580	680
Smart lock (indoor)	169	223	277	331	385
Smart lock (outdoor)	272	343	414	484	555
Camera (indoor)	60	78	95	112	130
Camera (outdoor)	90	121	152	184	215
Motion sensor	17	32	46	60	75
Light sensor	17	30	44	57	70
Curtain motor	75	131	188	244	300
Water leak sensor	15	32	50	68	85
Gas leak sensor	41	56	70	85	100
Central Hub/ Gateway	75	99	122	146	170

Each tier is a share of the gap between net cost and the final customer price (not a fixed % of retail) : SYLTRA technical team at 25% of that gap, wholesale at 50%, and distributors/independent technicians at 75% : keeping every level below the next regardless of a product's underlying cost.
