Capitalization Table

Current ownership structure, proposed investment round terms, and the resulting post-money cap table : sized to the actual capital need in this investment plan.

ENGLISH VERSION

Confidential, recipient-only : for investment negotiation purposes

SYLTRA SMART®
Riyadh, Kingdom of Saudi Arabia

Current equity split among the three founders, before any outside investor.

Shareholder	Role	Ownership
Lead Founder	Vision, strategy, and stakeholder relations (Anas)	50%
Co-Founder 2	Founding partner	25%
Co-Founder 3	Founding partner	25%
Total		100%

This split is a working assumption based on "lead founder holds a larger share" : the exact ratio between co-founders 2 and 3 can be adjusted per the actual founders' agreement.

The proposed valuation is derived directly from the actual capital need documented in the investment plan : not a standalone assumption.

Item	Amount (SAR)
Phase One costs (6-month foundation & marketing)	789,880
Capital for first scaled commercial batch (1,000-unit scenario, high end)	≈157,000
Operating contingency reserve (≈10%)	≈95,000
Total Targeted Capital Need	≈ 1,041,880

Proposed Round Terms

Item	Value
Investment amount requested	SAR 900,000 (≈ \$240,000)
Proposed equity stake	20%
Post-money valuation	SAR 4,500,000
Pre-money valuation	SAR 3,600,000

Valuation logic: the amount requested (SAR 900,000) covers the large majority of the documented total capital need (≈SAR 1,042,000), with the remaining gap expected to be covered by Phase One's projected revenue (SAR 459,000). A 20% stake for this amount sets pre-money valuation at SAR 3.6 million : a relatively conservative figure for a pre-full-revenue stage, leaving room for higher valuations in later rounds as market traction is proven.

With the investor taking a 20% stake, the three founders are diluted pro-rata, with their relative ratio to each other unchanged.

Shareholder	Pre-Round Stake	Post-Round Stake (Diluted)
Lead Founder	50%	40%
Co-Founder 2	25%	20%
Co-Founder 3	25%	20%
New Investor	:	20%
Total	100%	100%

New Investor Stake

Recommendation: reserve 10–15% as an employee stock option pool (ESOP) in a following round, typically dilutive to founders pro-rata : worth discussing with the investor now to avoid added complexity in the ownership structure later.
