

SYNTRA[®] | HOME
— Smart Living. Seamlessly Connected. —

Company & Product Profile

Smarter TV. Smarter Home. Simpler Life.

SYNTRA Smart Home is SYNTRA's connected-home platform — one dashboard, one physical Hub, and SYNA, a bilingual voice assistant, controlling lighting, climate, security, and entertainment across the household.

PREPARED FOR	VERSION	PREPARED BY
General audience & partners	1.0 · 2026	SYNTRA SMART

What is SYNTRA Home?

One dashboard for the whole household — lighting, climate, locks, cameras, and energy, in a single dark, bilingual interface.

The live SYNTRA Smart Home dashboard: favorite devices, live status, and one-tap scenes.

“تلفزيون أذكى. منزل أذكى. حياة أسهل.”

“Smarter TV. Smarter Home. Simpler Life.”

SYNTRA Home brings every connected device into one interface: a 3D room map, favorite-device shortcuts, named scenes like Sleep Mode and Away Mode, and a live notification feed — all controllable from a phone, a wall panel, or by voice.

سينا — The Intelligence Behind SYNTRA

A bilingual voice assistant built into every SYNTRA surface — not a separate app.

يتحدث بطلاقة · Speaks fluently

ذكي ومستباق · Smart & proactive

يتحكم بكل شيء · Controls everything

REAL NAMED SCENES

Good Morning

صباح الخير

Movie Night

وضع السينما

Sleep Mode

وضع النوم

Away Mode

وضع خارج المنزل

SAMPLE VOICE COMMANDS

“سينا، اعرض الكاميرات” — Show the cameras

“سينا، أطفئ جميع الأنوار” — Turn off all the lights

“سينا، افتح الستائر” — Open the curtains

SYNTRA Hub & the 10.1" Control Screen

Two physical touchpoints, one shared design language with SYNTRA TV.

SYNTRA Hub (left) and the 10.1" wall-mounted control screen (right), shown with the ambient blue backlight both devices share.

SYNTRA Hub

"The brain of your smart home & entertainment." A small, black, unobtrusive puck with a single blue light strip — the same Hub that also powers SYNTRA TV.

10.1" Control Screen

"Smart home control at your fingertips." A wall-mounted panel with the same card-and-scene interface as the phone dashboard, plus a persistent voice bar for SYNA.

What it does for the household

Your home within reach

المنزل في متناولك

Full control of lighting, climate, curtains, locks, and cameras from one screen.

Named scenes, not device lists

Good Morning, Sleep Mode, Movie Night, and Away Mode each do several things from one tap.

Bilingual by default

Every screen and every voice command works natively in Arabic and English, not one translated from the other.

Privacy & security

خصوصيتك أولاً

Data fully protected and shared with no one — stated as a first claim, not a footnote.

Connected to SYNTRA TV

The same Hub, the same SYNA assistant, and the same account power both the home and the entertainment system.
